MANUFACTURER'S SALES REPRESENTATIVE

LEESON Electric, the world's most customer-focused motor, gearmotor and drives company.

"America's Largest Manufacturer of High Impact Polycarbonate Enclosures" with more sizes than any other mfg. NEMA 4/4X and IP69 rated. UL/CUL/CE Listed. Stronger, lighter and more UV resistant than fiberglass enclosures. **Eco-Friendly Recyclable**

Extensive product line of AC & DC electric motors. Integral and fractional, general service, VFD Rated, HVAC, Pump Motors and Class 1 Div. 2 hazardous location. PMAC & PMDC Motors. Micro MAX™, Black MAX®,

Fuji Electric Corp of America – Manufacturer of a complete line of variable frequency drives. Product range from single phase 115V micro drives to 1000 HP packaged systems. Applications include NEMA 3R packaged pump drives, HVAC bypass drives, and industrial drives for both constant and variable torque applications. Wide range of communication protocols. Additionally Fuji offers a complete HMI offering, exceptional features, including web enabled, wireless LAN, sizes from 5.7 to 15" screens, NEMA 4X rated and connectivity to popular PLCs including over 20 Ethernet drivers and 8 field bus options.

E-T-A offers over current protection for the automation & process control industry. This includes Din Rail Mount Circuit Breakers, Din Rail Mount Socket Breakers, Fuse Replacement, and Intelligent Networked Power Distribution Systems.

SNC Manufacturing builds dry type transformers and custom magnetics. This includes industrial control, chokes, reactors, military grade, medium voltage, and toroidal transformers. Value added services: over molding, brackets, enclosures, and custom design assistance.

wieland

Leading manufacture of power and signal interconnect products, PCB terminals and connectors, Power supplies, Industrial Ethernet Programmable safety controllers, "PODIS" power distribution systems, and Heavy Duty Connectors

Atkore/Flexicon Cable management solutions, including metallic and non-metallic flex conduit and sleeving. Products to address robotic, Haz Loc, and hygienic applications.

PQC portfolio includes MANGOLDT Line/Load Reactors, Input Harmonic Filters, Sine Wave/dv/dt Filters, L-C-L Filters, as well as FRAKO capacitors and related components used in addressing IEEE19 standards and other power quality concerns.

Best Purging Systems. Type Y & Z purging systems for electrical controls in Haz Loc applications. Includes cost effective direct product crosses to P&F/Bepco EPS standards.
